

96-4050: CalB immo KIT

each kit contains 3x10g of each of the following items:

Strem Catalog #	Description	Immobilized on	Immobilization	Enzyme activity (PLU/g dry)
07-3130	CalB immo Plus™	DVB/methacrylate	Adsorption	>9,000
07-3148	CalB immo 8806™	Octadecyl methacrylate	Adsorption	>10,000

Appearance: White to slightly yellow spherical beads, free from foreign matter

Optimal Storage Condition: Keep in dry conditions (2-8°C).

Shelf Life: 1 year

Contents are available for individual sale.

Principal Applications

- Screening of immobilized lipases for process development
- Esterifications (regio- and stereo-selective)
- Transesterification
- Amidation
- Fats and oils modification

Advantages

- Fast screening in process development
- Wide selection of enzyme carriers for different applications

Availability & Shipping

Our products are available globally in various sizes including bulk shipping.
