

Catalog # 08-2046 (R)-(+)-5,5',6,6'-Tetramethyl-3,3'-di-t-butyl-1,1'-biphenyl-2,2'-diol, 99%
(R)-BIPHEN H₂

Technical Notes:

1. Zirconium bis(amido) catalysts for asymmetric intramolecular alkene hydroamination.
2. Electron-withdrawing, biphenyl-2,2'-based compounds for asymmetric catalysis.
3. Kinetic resolution of planar-chiral (η^6 - arene)chromium complexes by molybdenum-catalyzed asymmetric ring-closing metathesis.
4. Alternatives to phosphinoxazoline (t-BuPHOX) ligands in the metal-catalyzed hydrogenation of minimally functionalized olefins and cyclic β -enamides.
