

Catalog # 15-0212

[S(R)]-N-[(S)-1-[5-(Diphenylphosphino)-9,9-dimethyl-9H-xanthen-4-yl]ethyl]-2-methyl-2-propanesulfonamide, 95%

Offered in collaboration with **Daicel Chiral Technologies (China) CO. LTD**

## Technical Notes:

A series of chiral **sulfonamide phosphine** (SadPhos) ligands with structural diversity and practical stability are based on non-C<sub>2</sub> symmetry. Upon practical applications, the above SadPhos ligands have been evidenced to show good catalytic performance in a series of asymmetric cyclization, cycloaddition, Pd catalyzed asymmetric coupling reactions, kinetic resolutions, Au catalyzed asymmetric hydroarylation, ring-closing/ring-opening reactions and many others [1-12].
