

Catalog # 45-0225 (R,R)-(-)-1,2-Bis[(o-methoxyphenyl)(phenyl)phosphino]ethane(1,5-cyclooctadiene)rhodium(I) tetrafluoroborate, min. 95%

Technical Notes:

1. Highly reactive enantioselective catalyst for the asymmetric hydrogenation of various substituted dehydroalanines to N-protected aminoacids. Also, catalyst is very effective in the asymmetric reduction of pentapeptides that contain unsaturated Phe or Tyr linkages to enkephalin, a brain peptide hormone.
2. Efficient catalyst for the asymmetric reduction of enol acetates to esters.
3. Catalyst used to prepare chiral 2-substituted succinic acid derivatives.

Z-OBn-(S)-Try-Gly-Gly-(S)Phe-(S)Leu-OMe

de ratio S:R = >98:<2
