

Catalog #	93-2801	Nickel(II) chloride, dimethoxyethane adduct, min. 97%
		

Technical Notes:

- As a catalyst to synthesize enantioenriched benzylic boronic esters via the borylation of racemic benzylic chloride.¹
- Catalyst for the regioselective acylation reaction of β -ketoesters by photoactivation by visible light in the presence of Lewis acid or base catalysts.²
- Promotes the copper catalyzed reductive trifluoromethylation of alkyl iodides with Togni's reagent.³
