

Catalog # 93-7505 Rhenium(VII) oxide (99.99%-Re) PURATREM

Re₂O₇

Thermal Behavior:

- Melting point: 225 °C [2]
- TGA available in [2]

Technical Notes:

1. Volatile metal oxide precursor for the deposition of **rhenium containing** thin films by CVD and ALD with good volatility.

Target Deposit	Deposition Technique	Delivery Temperature	Pressure	Co-reactants	Deposition Temperature	Ref.
ReO _x (x≤2)	PECVD	150 °C	0.2 Torr	H ₂ plasma	48-570 °C	[1]
