

Catalog # 77-0950 1,5-Cyclooctadiene(η 5-indenyl)iridium(I), 99%

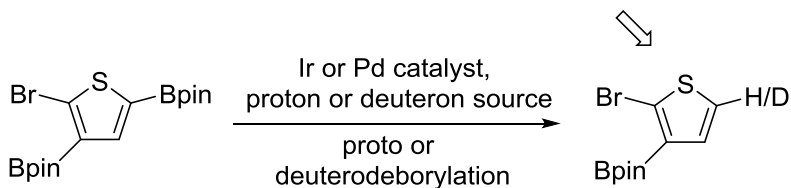

Technical Notes:

1. Iridium-catalyzed borylation of thiophenes: versatile, synthetic elaboration founded on selective C-H functionalization.
2. Harnessing C-H borylation/deborylation for selective deuteration, synthesis of boronate esters, and late stage functionalization.

complementary regiochemistry
and site-specific labeling
