

Catalog # 15-2212 1-[(2S)-1-(Di-o-tolylphosphinoxy)propan-2-yl]-3-phenylurea, min. 97%

Note: Sold under license from InCatT for research purposes only. WO2004/103559. UREAphos and METAMORPhos Ligand Kit component.

Technical Note:

1. The UREAphos ligands are a new class of ligands containing a urea group, which due to its self-complementary hydrogen bond character, enables the formation of bidentate ligands in a supramolecular fashion. This interesting feature makes this ligand class highly suitable for combinatorial approaches and high throughput experimentation.
