

Catalog #16-0422 4-Cyano-4-(thiobenzoylthio)pentanoic acid, min. 97%

Note: Sold for research purposes only under license from CSIRO.

Technical Notes:

1. A sulfur-based, chain-transfer agent providing a high degree of control for living radical polymerizations utilizing the RAFT (reversible addition-fragmentation chain-transfer polymerization) technique.
2. For overview of RAFT with references see [RAFT Agents Literature Sheet](#).
