

Catalog # 93-2829 Nickel(II) naphthenate, ~60% in toluene (6-8% Ni)

Technical Notes

1. Catalyst for addition polymerization of silyl-containing norbornenes.
2. Used in catalytic aquathermolysis of asphaltene and resin [2].
3. Used in the fabrication of Sub-10nm metallic Lines of low line-width roughness by hydrogen reduction of patterned metal-organic materials [3].
4. Used in fabrication of nickel hollow spheres by microemulsion-template-interface reaction route [4, 12].
5. Hydrogenation catalyst used for synthesis and characterization of star-comb polybutadiene and poly(ethylene-co-butene) [5].
6. Catalyst for the polymerization of 1,3-butadiene [6].
7. Used as an as antibacterial agent in textile industry [7].
8. Important compound for fluid catalytic cracking (FCC) process [8].
9. Hydrogenation catalyst of styrene-isoprene-butadiene rubber [9].
10. Styrene-butadiene polymerization catalyst [10-11].

Tech. Note (1); Ref. (1)

Tech. Note (9); Ref. (9)
